ProjectName	**Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer**
Maximum Marks	3 Marks

FLOW ASSIGNMENT TO SERVICE CATALOG

Milestone 3 : Service Catalog

Activity 1: Service Catalog for placing order and get Approval

1. Click on All >> Search for " Service Catalog ".
2. Click on Service Catalog >> click on Hardware.
3. Scroll a bit to find the " Standard Laptop " click on that.
4. After that click on " Order Now " to place the request.

Configuration Overview

The completed flow is assigned to the Standard Laptop Service Catalog item through the Process Engine configuration. This connects the automation to the catalog item used by the requester.

Key Configuration Steps

- Open ServiceNow and search for Maintain Items.
- Open the Standard Laptop catalog item.
- Select the Process Engine section.
- Remove the remaining automation where required by the project procedure.
- Add the Flow option.
- Select the flow named “Standard laptop task”.
- Save the catalog item record.

FLOW ASSIGNMENT TO SERVICE CATALOG – DESCRIPTION

Implementation Details

The source document shows the Standard Laptop catalog item with the Process Engine configuration and the Standard Laptop task flow selected. Once assigned, the Service Catalog item can invoke the configured automation when a Standard Laptop order is placed.

Project Context

This configuration forms part of the Standard Laptop procurement automation workflow. The project connects the Service Catalog request, approval process, Flow Designer automation, Requested Item, and generated Catalog Task to reduce manual intervention and support timely laptop configuration.

Verification

The implementation should be checked in ServiceNow after configuration. The relevant configuration should be visible, the flow should be active where applicable, and the Standard Laptop request should produce the expected Catalog Task values. The final task should reflect the configured values and assignment.

Expected Result

The configuration contributes to a streamlined procurement process in which the Standard Laptop request can progress through approval and automated task creation, with the Hardware team receiving the configuration work.
