README

Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Overview

This project uses ServiceNow Flow Designer to automate standard laptop procurement. It is designed to address delays and manual overhead in the configuration of standard laptop requests.

Problem

The current process lacks efficiency and automation. Standard laptop requests require configuration, and the configuration step can be overlooked or delayed.

User Story

As a member of the IT procurement team, I want a streamlined process for ordering standard laptops so that tasks are automatically generated and assigned to the hardware team for configuration.

Objectives

- Ensure timely configuration of standard laptops.
- Reduce manual intervention and potential errors.
- Optimise task allocation within IT.
- Improve efficiency and productivity.

Technology / Platform

- ServiceNow
- Flow Designer
- Service Catalog
- Create Catalog Task
- Process Engine

Implementation Summary

Flow Configuration

- Create the flow named Standard laptop task.
- Use Global application and System User.
- Add Service Catalog trigger.
- Add Create Catalog Task action.
- Use Requested Item Record.
- Set description to Laptop need to Configured.
- Set Assignment group to Hardware.
- Set Approval to Approved.
- Save and activate the flow.

Service Catalog Assignment

- Open Maintain Items.
- Select Standard Laptop.
- Open Process Engine.
- Add the Standard Laptop Task flow.
- Save the catalog item.

Testing Workflow

- Open Service Catalog and select Hardware.
- Select Standard Laptop and choose Order Now.
- Open the Request Number.
- Approve the request.
- Open the Requested Item.
- Open Catalog Tasks and verify the generated task.

Expected Outcome

The completed workflow automatically creates the required configuration task after the request is approved and assigns it to Hardware, supporting timely configuration and reducing manual intervention.
